👤 ABOUT ME

Dedicated Front End Developer, MERN Stack Developer, and Technical Project Lead with a proven track record of engineering scalable, high-performance web applications and driving technical delivery. Specialized in crafting seamless, responsive user interfaces with HTML5, CSS3, JavaScript, React and Next.js, while architecting robust server-side logic using Node.js, Express, and MongoDB. Adept at steering cross-functional teams through Agile development lifecycles, balancing project planning and resource allocation with hands-on development. A strategic problem-solver proficient in optimizing RESTful APIs, managing project risks, and aligning technical execution with stakeholder objectives to deliver efficient, real-world digital solutions.

📁 WORK EXPERIENCE

🏢 Enroute Technology – Civic Center, Bahria Phase 4, Rawalpindi, Pakistan

Front End Developer

[2026 – Present]

- Develop responsive, user-friendly web interfaces using HTML5, CSS3, JavaScript, and React.js.
- Convert UI/UX designs into reusable, component-based front-end code with clean structure and cross-browser compatibility.
- Integrate REST APIs and collaborate with back-end developers and designers to deliver features on schedule.

🏢 Shopping Mart – Kahuta, Pakistan

Inventory Manager

[March 2026 – Present]

- Oversee daily inventory levels, coordinate stock replenishment, and manage supplier relationships to prevent stockouts.
- Implement digital tracking systems to improve accuracy in stock counts and reduce operational discrepancies.
- Analyze sales data to optimize warehouse space and streamline distribution workflows.

🏢 Callify Pvt Limited – Giga Mall, Pakistan

Network Operator

[June 2025 – September 2025]

- Monitor network performance and troubleshoot connectivity issues to ensure maximum uptime and system reliability.
- Manage hardware installations and configure routers, switches, and firewalls for efficient data flow.
- Perform regular system backups and implement security protocols to protect internal network infrastructure.

🎓 EDUCATION AND TRAINING

Bachelor of Science in Computer Science

KICSIT (Sub Campus of IST)

[2022 – 2026]

City: Kahuta | Country: Pakistan | Website: [kicsit.edu.pk](https://www.kicsit.edu.pk) | Field(s) of study: Computer Science | Status: Completed

Intermediate (Pre-Engineering)

KRL Model College for Boys

[2020 – 2022]

City: Kahuta | Country: Pakistan | Field(s) of study: Pre-Engineering

🔧 PROJECTS

Accident Detection and Emergency Alert System Final Year Project — IoT / Arduino

- Designed and developed an IoT-based smart system to reduce response time during road accidents by automatically detecting collisions and notifying emergency contacts.
- Processes accelerometer sensor data continuously to detect sudden impacts or abnormal vehicle vibrations indicating a collision.

- Retrieves precise geographical coordinates (Latitude and Longitude) at the time of impact using a GPS module.
- Dispatches automated SMS alerts containing location coordinates and accident details to pre-stored emergency contacts and rescue authorities using GSM communication.

Student Welfare Management System

Java Application

- Developed a comprehensive Java-based application specifically designed for university environments to manage student welfare services.
- Streamlined administrative tasks related to student support, records management, and welfare resource allocation.

Dollar Variety Mart

Inventory Management App

- Built a robust application for managing retail operations, including real-time stock tracking and inventory updates.
- Integrated features for sales monitoring, reporting, and operational management to improve store efficiency.

Learnify – Learning Management System

Full Stack

- A full-stack learning platform where users can enroll in courses, track progress, and earn badges.
- Includes user authentication, admin dashboard, and dynamic course content management.

EduManager – School Management System

Laravel + Blade + MySQL

- Built a school management system with role-based authentication and CRUD operations.
- Developed UI with Blade template and backend logic with Laravel and MySQL.

Personal Portfolio Website

Front End / React.js

- Built a responsive single-page portfolio with a fixed navigation bar (Home, About, Skills, Projects, Contact) using React.js and CSS.
- Implemented reusable components, smooth section navigation, and mobile-friendly layouts.

Responsive Business Landing Page

HTML / CSS / JavaScript

- Designed a fully responsive multi-section landing page using Flexbox, CSS Grid, and media queries.
- Added interactive elements with JavaScript such as a mobile menu, form validation, and scroll effects.

E-Commerce Product Store UI

Front End / React.js

- Developed a product listing interface with search, category filters, and a shopping cart using React hooks and state management.
- Built reusable, responsive components and integrated product data through REST APIs.

⚙️ Technical & Management Skills

HTML5 / CSS3 / Javascript / React.js / Next.js / Responsive Web Design / C++ / C / PHP / Node.js / Express.js / MongoDB / Mongoose / REST APIs / JWT / Appwrite / Laravel / PostgreSQL / Git / GitHub / VS Code / Postman / Firebase / Vercel / Agile & Scrum / Project Planning / Team Leadership / Resource Allocation / Risk Management / Stakeholder Communication / Technical Product Management
